Incident Narrative:

Incident Reporting Officer: James D Perkins

On Wednesday, 20 January 2016 at 15:12:41, units T04, E09, E04, E05, T09, BC01, E03, BC03, I04, I01, E05, E07, I02 and T04 responded to a reported 1 - Fire at 648 N Van Ness AVE, Fresno, CA 93728. Upon arrival a 111 - Building fire incident was found.

The primary property use is 419 - 1 or 2 family dwelling.

Unit E03, the first arriving unit, arrived at 15:15:10. The last unit on scene, I02, cleared the scene at 20:28:57.

Actions taken by the primary responding units were: 11 - Extinguish; 20 - Search & rescue, other; 32 - Provide basic life support (BLS); 52 - Forcible entry; 81 - Incident command and 86 - Investigate.

A total of 14 units and 38 personnel responded to this call.

Fresno City Fire Department
Structure Fire, Incident #6003909
Engine 3A: FF Perkins, Capt. Palmer, FFS Tatham, FF Gonzalez

Synopsis:

This report details a fire on 01/20/2016 at 15:11 hrs. in a two-story house built in 1928, located at 648 N Van Ness Avenue, Fresno, CA 93701.

The fire burned a portion of the front room on the A side of the building, and one male patient was located inside the home, and extricated to the front yard where it was determined he had

CRMC via American Ambulance.

Source of Activity:

On 01/20/2016 at 15:11 hrs, E3 responded to a residential structure fire in the area of N Van Ness and Bremer. We were just clearing a medical aid call approximately six houses south of that location, at 550 N Van Ness, giving us very limited response time. From the location of the Medical Aid, we visualized a woman frantically waving at us and noticed light smoke in the area. I informed Communications that we were clear of the medical aid, and responding to the fire call on Fire 1.

Initial Observations/Actions:

E3 was first to arrive, and noted a two-story single family residence with light smoke showing from the first floor. The crew of E3 first had to make access through a heavy duty wrought-iron fence. The fence contained a rolling gate and swinging man-gate, which were both locked. Several attempts were made by the crew of E3 to breach either gate before the rolling gate was breached and slid out of the way, giving access to the driveway. E9 arrived and I assigned them to assist with Fire Attack and establish 2-out.

BC1 arrived and we did a face-to-face. I informed him of what I had thus far, and what the assignments were. BC1 assumed Incident Commander and assigned me Deputy Incident Commander.

FF Gonzalez (E3) pulled a 1 ½" hose line down the driveway and towards the front door, and FF Douglas (E9) pulled a second 1 ½" hose line. Members from E3 and E9 attempted to breach the front door on the A side (west) of the building using hand tools. They noted that it appeared to be highly reinforced and extremely

Fresno Fire Department

Incident Report

911 H Street
Fresno, CA 93721
(559) 621-4181 FAX (559) 498-4323

difficult to breach. After several attempts, I advised them of a second door on the B (north) side of the building, which I noticed during my 360 walk around. Efforts from E3 and E9 crews were then focused on the door on the B side of the building. It was noted that this door was also reinforced from behind, causing a delay in gaining access to the house. Note- I observed a third door to the rear of the house (C side), but deemed that door not ideal due to the fact that it was also locked, and a large barking dog could be heard on the inside of it. I assigned T4 to assess for ventilation, and their crew of 4 personnel split into two groups of 2. FF Otto (T4) utilized the chainsaw to breach the front (A side) door, which still took several minutes to accomplish. At the same time the A side door was breached with a chainsaw, crews also breached the B side door with hand tools. Upon further investigation both doors were found to have been reinforced and barricaded from the inside.

E4 arrived and was assigned to stage by a hydrant. T9 also arrived and was assigned RIC. With both the A side and B side doors breached now, the Fire Attack group took their hose line to the A side door, where they encountered a relatively small amount of fire on the floor just inside the A side door. Before making entry they had to remove a plastic folding table, which had been pushed up against the back side of the door. Captain Palmer from E3 (Fire Attack) informed me that at one point he encountered a locked bathroom window, unlocked it and slid the window open, then removed the screen in an attempt to ventilate the immediate area.

When the door on the B side of the house was removed, it was noted that a second door was leaning up against the back side of that door. Also noted was a 5-gallon propane tank placed on the first stair going up. Capt. Garnier (T4), FFS Sickler (T4) and FFS Philbin (T4) were assigned to Search Group. They began their search by going from the door on the B side, up the stairs to the second floor. They reported the second floor all-clear, and that it appeared to be just storage.

FF Douglas (E9) located a door just inside the side B door and to the right. A few attempts were made to breach this door before it gave way, noting there was a large metal piece of machinery pushed up against the inside of the door. The door and machinery were removed so access into the house could be made.

I was told by the Incident Commander (BC Tuggle) to make an announcement for crews to be on the lookout for potential booby-traps and hazards, and the announcement was made over the radio.

The Search group moved down to the first floor of the house and located a male patient in a back room. Capt. Garnier and FFS Philbin removed the patient to the front yard, where he was determined to have [REDACTED]

E4 was assigned to bring their personnel up to assume Medical group. Crew members from E4 [REDACTED] joined by American Ambulance, and two members from E4 [REDACTED]

Fire Attack declared the fire under control, and they were asked to remain outside the house.

Search Group completed a search of the remaining areas of the house, in which no further patients were located.

At that point the FFD Fire Investigations team and FPD Homicide took control of the scene.

Summary of Statements:

See I01 Perez's report for Statements

Scene Examination:

Refer to I01 Perez's report.

Exposures:

The immediate fire exposure consisted of the second story of the house. As for a potential exposure, there was a residence to the south, and a residence to the north of the house. Neither was ever in eminent danger.

Conclusion:

Refer to I01 Perez's report.

On Wednesday, 20 January 2016 at 15:12:41, unit T04 responded to 648 N Van Ness AVE, Fresno, CA 93728. Upon arrival a 11 - Structure Fire incident was found.

Unit T04 arrived at 15:17:21 with 4 personnel

The actions taken by this unit were: 11 - Extinguish; 21 - Search and 22 - Rescue, remove from harm.

On Wednesday January 20, 2016, at approximately 1511 hours, T-4 responded to a residential structure fire at 648 N. Van Ness Ave. in the city of Fresno, county of Fresno, state of California. This is Fresno Fire department incident # 6003909. T-4 arrived and was given the assignment to make an assessment for possible ventilation. I, Captain Garnier had the crew of T-4 get the tools necessary for ventilation ready. I completed a 360 of the structure and made a face to face with command. During my 360, I shut off power to the structure at the main electrical panel and relayed this information to command via my hand held radio. I met the crew of T-4 on the exterior of the structure, on the "A" side, where they were forcing entry to the front door with a chainsaw. The front door was opened and a handline was brought through that opening. The E-5 FF had a hard time extinguishing a small fire right inside the front door. It appeared that there was a flammable liquid, or possibly melted plastic, at the front door entrance, which would not extinguish easily. It also appeared that the front door had been barricaded from the inside, as well as nailed shut. I also tried to further open the broken glass window next to the front door, but this window had heavy gauge wire mess attached to the inside of it. I notified command via a face to face conversation that this building was a little odd, and that we should be careful. I noted that the doors and some windows were barricaded, there are security cameras in numerous places, and a large dog inside the rear entry point of the structure. T-4 was then assigned to conduct a primary search of the structure. FFS Sickler and FF Otto entered on the "B" side entrance and searched the upstairs with a negative result. Myself, and FFS Philbin searched the downstairs and entered from the same "B" side entrance. FFS Philbin and I located a victim in the "B/C" corner of the structure. I radioed that we found a victim and were bringing him out. Upon retrieving the victim we noticed that he had what appeared to [REDACTED] This was relayed to command. T-4 turned Patient care over to E-4 and T-4 resumed its search with further [REDACTED]

SYNOPSIS

This report documents my actions and findings related to a residential fire investigation.

The fire caused moderate fire damage.

There was one fatality identified at the time of this report.

The cause of this fire is classified as INCENDIARY.

No suspects have been identified at the time of this report and this incident remains under investigation.

SOURCE OF ACTIVITY

On Wednesday, January 20, 2016 at approximately 1511 hours Fresno County Dispatch received a 911 emergency call reporting a residential fire at 648 N. Van Ness Ave., Fresno City in the county of Fresno. A residential fire alarm assignment responded.

First arriving fire units arrived on scene at approximately 1515 hours. Initial size-up reported people waving in Engine Company 3, light smoke showing. A working fire notification was broadcast at approximately 1515 hours.

At approximately 1528 hours a Fire Investigator response was requested.

At approximately 1531 hours, while working my normal schedule with the Fresno Fire Department as Fire Scene Investigator I01, I responded to the incident with Fresno County Dispatch. I responded code two from 3187 W. Belmont Ave., Fresno City, CA. I arrived at the fire scene at approximately 1539 hours. I cleared the fire scene at approximately 2023 hours.

OBSERVATIONS/ACTIONS

Upon my arrival I observed numerous FFD apparatus and personnel in suppression mode of a residential fire. I did not observe any active fire behavior. I only witnessed smoke coming from the residence.

I initially made contact with suppression Incident Commander, Battalion Chief Tuggle, T. #07297 (CHIEF TUGGLE) and advised him of my presence. CHIEF TUGGLE briefed me as to his initial findings and requested that I order additional police officers for the civilian casualty that presented late in the suppression operation.

I assisted with the fire scene origin and cause by documenting the fire scene with digital photographs and processing the area of origin.

VICTIM: [REDACTED]
REPORTING OFFICER: Tracy, Jay #F685
REPORT #: 16-003909.JT.1

SYNOPSIS

This report documents my actions related to an occupied residential fire investigation. The fire caused moderate fire damage. There was one fatality, related to this fire incident, identified at the time of this report. The classification of this fire is incendiary. No suspects have been identified at the time of this report.

SOURCE OF ACTIVITY

On Saturday, January 20, 2016 at approximately 1511 hours, Fresno County Dispatch received a 911 call reporting an apartment fire at 648 North Van Ness Avenue, Fresno City in the county of Fresno. A full residential first alarm assignment was dispatched at 1512 and three engines, two trucks, two battalion chiefs and one EMS unit responded.

The first fire units arrived on scene at approximately 1515 hours. Initial size-up reported a two story, single-family, residential structure with smoke showing from the A-B corner. Smoke was witnessed coming from the front porch area and the subfloor below the front window near the A-B corner. A working fire notification broadcast at approximately 1515 hours.

At approximately 1512 hours, while working my normal schedule with the Fresno Fire Department as Staff Investigator – I04, I responded to the incident code 2 from Blackstone Ave and Olive Ave. after clearing from another detail in the immediate area. I arrived at the fire scene at approximately 1515 hours. I cleared the fire scene at approximately 2200 hours.

OBSERVATIONS/ACTIONS

Upon my arrival, I observed one FFD apparatus and suppression personnel engaged in initial investigation and size up. The FFD suppression crews had to force entry of a man gate and vehicle gate to gain access to the residence. More FFD apparatus arrived after my arrival and began suppression efforts. Scene Investigator – I01 Perez, RJ #F363 also arrived.

I witnessed light smoke coming from the Alpha side of the structure, front door and front window area. The smoke appeared to be coming from the A-B corner of the residence near the subfloor below the window. Forced entry was attempted at the front door without success; the door seemed to be heavily fortified and eventually required the use of a chainsaw to gain entry. A few minutes later flames could be seen in the front window. Ingress was also attempted on the Bravo side door. This door also proved difficult to breach due to apparent fortification. Entry was obtained about the same time from both portals. Fire was present in the front room near the front window and door. The fire seemed difficult to extinguish; the fire was easily "pushed" with the fire stream.

While gathering witness statements, I witnessed FFD suppression crews extricate a victim, later identified as

Fresno Fire Department

Incident Report

911 H Street
Fresno, CA 93721
(559) 621-4181 FAX (559) 498-4323

from the residence. The victim was extricated out the front door and placed on the driveway where BLS measures were initiated by FFD suppression crews. I noted the and had signs of being inside the structure during the fire. I then went to the street to notify EMS that a victim had been extricated and their assistance would be required. Three notification attempts were made before EMS responded. I also requested the Uniformed Patrol Officer from the Fresno Police Department (FPD), who was also present shortly after my arrival and assisted with traffic control initially, to assist in clearing the roadway for EMS who would be transporting soon.

I returned to the location of the victim and made contact with Scene Investigator Perez. As we began to develop a plan we were advised by Fire Captain Fulmer, Tim that the victim had . At this time I logged on with FPD and requested assistance from FPD dispatch. Contact was made again with the Uniformed Patrol Officer and a request was made to assist in locking down the scene due to the nature of the .

Scene Investigator Perez and I then made contact with the FFD Incident Commander, Battalion Chief – BC1 Tuggle, Todd #F07297 and requested that all non-essential efforts inside the residence be stopped and access to the residence be denied. The residence was secured and no personnel entered. Staff Investigator – I02 Wilding, Lee #F634 arrived to assist with the investigation. Investigator Wilding was assigned the Investigation Team IC position. Fresno PD Homicide eventually arrived and assisted with the investigation. FPD homicide detectives Rivera #P1146 and Dodd #P280 later arrived on scene. FPD Lieutenant Farrah and Sergeant Bowlin also arrived and assisted.

I further assisted with the investigation by conducting interviews, assisting with documenting of the fire scene with digital photographs and sketch of the residence, entry/exit record keeping and processing the area of origin. For further details on my actions and finding on this fire incident refer to my investigations report 16-003909.JT.1.

Company Reporting Officer: Anthony R Vasconcellos

On Wednesday, 20 January 2016 at 15:12:41, unit E09 responded to 648 N Van Ness AVE, Fresno, CA 93728. Upon arrival a 11 - Structure Fire incident was found.

Unit E09 arrived at 15:15:37 with 3 personnel

The actions taken by this unit were: 11 - Extinguish; 51 - Ventilate and 52 - Forcible entry.

We arrived shortly after engine 3 and were assigned to assist with fire attack and establish two out. Upon arriving we approached the scene to see Engine 3 crew trying to force entry on the A side door, after a few attempts we spotted a door on the B side and attempted to breach the B side door as the A side was difficult due to being reinforced on the interior. We encountered the same scenario with the B side door as well. After multiple attempts with the irons we were able to open the B side door which had been reinforced on the inside as well. That door led to an upstairs portion of the residence and to the right of the stairs inside the B side doorway was a door that lead to the living room/front room of the residence which also had a door that I kicked in, it was also barricaded with items on the interior. At this point another company forced the A side door and we repositioned the hoselines to the A side, E3 crew and E9 FF entered the A side for fire attack, Specialist 9 and myself established 2 out. After fire attack knocked down the fire in the front room I witnessed Truck 4 crew carrying a victim through the front room and out of the A side door onto the driveway. We maintained 2 out and started the fan at the A side door for ventilation and entered the front room to finalize extinguishment of the residence.
